Education

Bharath Institute of Higher Education and Research

B.Tech in Electronics and Communication Engineering (GPA: 8.41 / 10.0)

Narayana Junior College

MPC (GPA: 7.03 / 10.0)

Sri Chaitanya Public High School

SSC (GPA: 9.70 / 10.0)

Oct 2021 – May 2025

Chennai, Tamil Nadu

Jun 2019 – May 2021

Kadapa, Andhra Pradesh

May 2018

Vempalli, Andhra Pradesh

Professional Skills & Knowledge

Linux & Systems Administration

- Worked with **30+ Linux commands** for directory navigation, file operations, permissions, and system structure understanding.
- Performed basic user and group management, process monitoring, service control, and Linux troubleshooting tasks.
- Practiced package installation, system updates, disk usage monitoring, and basic shell scripting through hands-on labs.

Monitoring, Observability & Dashboards

- Applied monitoring fundamentals including log analysis, metrics observation, alerts, and system reliability concepts.
- Analyzed **100+ log entries** using Kibana for searching, filtering, and visualization.
- Built **3+ Grafana dashboards** to monitor system metrics and observe real-time behavior.

Databases

- Worked with PostgreSQL concepts including tables, schemas, constraints, and relational database principles.
- Executed **20+ SQL queries** for data retrieval, insertion, updating, and deletion operations during lab practice.
- Gained exposure to query execution and basic database performance monitoring concepts.

Cloud & DevOps Tools

- Understood AWS fundamentals such as regions, availability zones, IAM basics, and shared responsibility model.
- Used AWS CloudWatch to observe logs and metrics for system performance monitoring.
- Completed hands-on labs covering Docker basics, Kubernetes fundamentals, and CI/CD workflow concepts.

Project Workflow Management

- Managed **10+ tasks/issues** using Jira for task tracking, updates, and workflow management.
- Followed Agile and Scrum practices during **2+ academic and practice-based projects**.
- Collaborated in team environments, maintained documentation, and tracked project progress effectively.

Projects

Major Project: Face Morphing Detection Using Deep Learning | Python, TensorFlow, OpenCV, Jupyter Notebook

- Designed and trained a CNN-based deep learning model for biometric face morphing detection.
- Preprocessed and analyzed **1,000+ facial images** (real and morphed) using OpenCV to improve model learning.
- Evaluated model performance using accuracy and loss metrics across multiple training iterations.

Minor Project: Esophagus Cancer Detection Using Medical Images | Python, YOLOv8, Deep Learning

- Developed an object detection pipeline using YOLOv8 for medical image-based cancer identification.
- Trained and tested the model on **800+ labeled medical images** with preprocessing and data augmentation.
- Measured detection performance using precision and recall metrics to assess model reliability.

Achievements

- Completed **2 major academic projects** involving deep learning, computer vision, and real-world datasets.
- Built and evaluated machine learning models using **1,800+ total images** across multiple datasets.
- Created **3+ monitoring dashboards** and analyzed **100+ log entries** during hands-on practice.
- Executed **20+ SQL queries** for data analysis and validation in academic labs.
- Managed **10+ tasks/issues** using Jira while following Agile and Scrum workflows.

Technical Skills

Operating Systems : Linux, Windows
Monitoring & Observability: Grafana, Kibana, AWS CloudWatch
Incident / Bug Tracking : Jira
Containers : Docker
Container Orchestration : Kubernetes
Application Servers : Apache Tomcat
Web Servers : Nginx
Cloud Platform : AWS
Databases : PostgreSQL, MySQL
Scripting & Automation : Shell scripting
API & Debugging : Postman, HTTP status codes

Declaration

I hereby declare that the above information is true to the best of my knowledge.
